Snel 5G via 3,5 GHz-band weer uitgesteld

1 september 2021 10:03 Min leestijd

De veiling voor de 3,5GHz-frequentieband, die belangrijk is voor een sneller 5G-netwerk, zal niet in april 2022 plaatsvinden, zoals eerder was gepland. De komst van een echt snel 5G-netwerk wordt daarom uitgesteld tot een later moment, schrijft demissionair staatssecretaris Maria Keijzer (Economische Zaken) in een brief aan de Tweede Kamer.
